Maths : Thursday 30th April

Grown ups- please note this is a brand maths concept for the children!

Perimeter

L.O. I can find the perimeter of 2D shapes.

REMEMBER: Perimeter is the distance all the way around a 2D shape.

To calculate perimeter, you need to measure each side of the shape and find the total.

Have a go at this game to practise your perimeter skills. (You will need to enable Flash on your computer).

OR

Look around your home and garden and find some 2D shapes. Measure the sides and calculate the perimeter.
