LO: To draw the numbers on a clock face

Create a clock face with your child to help them practice telling the time throughout the week. Support your child to write the numbers correctly round the clock face (look at a clock in your house, talk about the position of the numbers)

You could even personalise your clock by decorating it.

You will need:

- Paper plate
- Felt tips
- Card
- Glue
- Split pins
- Scissors

Handy hint: To help your child distinguish the difference between the clock hands, use a marker to write minute on the long hand and hour on the shorter hand.
