

We have decided to only plan a couple of new Curriculum Challenges for you this week. We realise that some of you might have already completed all of the ones from previous weeks and need something new. However, we only have one week left until half term and after that, we will design a new set of challenges based on our Summer Term topic about The Seaside (now and in the past). If you wanted to get a head start, you could start researching seaside holidays in the past.

<p style="text-align: center;">Design Technology</p> <p style="text-align: center;">Design and make a vehicle with moving parts.</p> <p style="text-align: center;">Your vehicle could be used on land, water or even in the air.</p> <p style="text-align: center;">You could use Lego, Knex (or other toys / construction kits), or you could use things from your recycling / kitchen (such as boxes, bags, cling film or foil).</p> <p style="text-align: center;">Think about how you will join pieces together and how your vehicle will move.</p> <p style="text-align: center;">Can you design it first by drawing a picture with labels, or make a step by step guide so that somebody else would be able to build it?</p> <p style="text-align: center;">When you have designed and made your vehicle, can you write an evaluation? Does it work in the way that you wanted it to? Is there anything you could do to improve it? If you made it again, what might you change? Have you learned anything during the process?</p>	<p style="text-align: center;">P.S.H.E.</p> <p style="text-align: center;">Being kind to ourselves and to others is a very important part of our EJ Way.</p> <p style="text-align: center;">Have a go at some of the Kindness activities (see Kindness PDF).</p>
