

Science

We are learning to identify ever green and deciduous trees.

Watch the clip:

<https://www.youtube.com/watch?v=7h5TiPevd-Q>

On a walk, in your garden or looking out the window have a look at the trees. Can you see trees that have leaves and trees that don't have leaves? Are they deciduous or evergreen?

Collect some deciduous and evergreen foliage. Look closely at the foliage and draw a picture. Label the picture to show the differences.

This can be completed on the activity sheet and stuck in books, or on a plain piece of paper.
