

Maths : Friday 1st May

Grown ups- please note this is a brand maths concept for the children!

Perimeter

L.O. I can find the perimeter of 2D shapes to design a zoo.

Today you need to use your perimeter skills to design a Zoo!

Think about all the animals you want to create enclosures for, then measure and draw each enclosure- they can be any 2D shape you like as long as you can find the perimeter! (Use squared paper if you want to.)

Once you have created your zoo, calculate the perimeter of each enclosure.
