LO: To tell and write the time to the hour and half past the hour

Use your clock for this activity.

Remind your child that at o'clock the minute hand should point to number 12 and the hour hand should be pointing exactly at the hour. At half past, the hour hand should be halfway between the hours. This is how the hour hand moves round a real analogue clock.

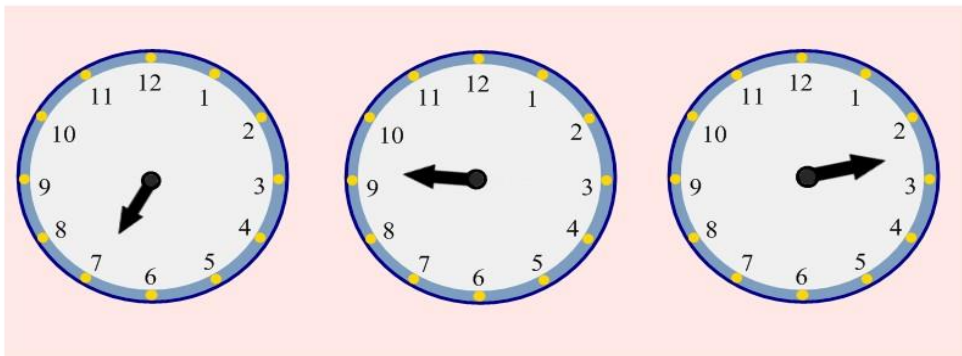

★

Use your clock to tell these times:

- 8 o'clock
- Half past 3
- Half past 1
- 10 o'clock
- Half past 11
- 8 o'clock

★★

The clock in Hannah's kitchen has lost its minute hand. Can you work out at what times Hannah ate?

★★★

It was a hot, sunny day when Tina went to a concert.

At the concert, she drank a glass of water at every half past the hour. The concert started at 6 o'clock and finished at midnight. Using your clock, can you show the different times Tina drank her water?
