

## Going To School Guide

You can get to school in many **different** ways. The most obvious and normal ways are: CYCLING, walking, driving (in a car), scooting, going on a bus or a train. But have you gone to school in a CANON or even on top of a car. No? Well you should think about it. Think of the **craziest**, most mind-blowing way to get to school. Like this (below).

Weird right? There's loads more weird ways. So next time you think to walk or cycle to school...think again. What about adding **wheels** to your bath, fill it with water, get in and ask someone to push it for you! Think. When your parents ask you to walk to school yell (you probably shouldn't do this... but...). Yell, BORING! and say I'm tying myself upside down on my broom, tie myself to the edge of the car. You driving! and also I'll be doing the Tarzan shout, don't mind me. Say that.

This is my made-up **map** to get to a school. there are two ways to get there.
