

## Remember to simplify!

$$\frac{3}{8} \times 2 = \frac{6}{8} = \frac{3}{4}$$

$$\frac{2}{9} \times 3 = \frac{6}{9} = \frac{2}{3}$$

$$2\frac{1}{4} \times 2 = 4\frac{2}{4} = 4\frac{1}{2}$$

$$\frac{4}{6} \times 5 = \frac{20}{6} = 3\frac{2}{6} = 3\frac{1}{3}$$
