Week Beginning 11 ${ }^{\text {th }}$ January 2021

| Day | Activity |
| :---: | :--- |
| Monday | Watch the video: https://youtu.be/ygwTCUer65Q <br> Today we are practising counting up to 20. You will need your number cards, your <br> number line to 20 and 20 small items (e.g. Lego bricks, beads, small cubes). Have these <br> ready before you watch the video. <br> Extra challenge: Play the Topmarks Gingerbread Man games independently, Remember <br> to say one number name for each item you count. <br> https://www.topmarks.co.uk/learning-to-count/gingerbread-man-game |
| Tuesday | Watch the video: https://youtu.be/d3n2BJdZHRo <br> Today we are using 10 frames to practise counting up to 20. You will need the sheet <br> below (print or ask an adult to draw it for you), a pen and your number line. <br> Extra challenge: Print the extra challenge sheet and match the 10 frames to the correct <br> numerals. This time, instead off filling in the spaces you are counting dots that are <br> already there. Remember your counting skills from yesterday. <br> Note for Parents and Carers: In the video it mentions leaving mistakes in our work. By <br> this, we mean crossing out errors and having another go rather than rubbing them out <br> or starting over completely. Seeing the errors helps us to plan next steps for each child. |
| Wednesday | Race someone at home along your number line. Roll a dice and count that many jumps <br> to move along the boards. First person to 20 wins! Which numbers did you land on? <br> How many dice rolls did it take? Play again - did the same person win? Which numbers <br> did you land on this time? <br> Extra challenge: Play a board game that has a number track on the board. You might <br> have a game at home or you can print 'snakes and ladders' from the school website. |
| Thursday | Watch the video: https://youtu.be/SoFQJ-KPZ_U <br> Today we are going to be finding the missing numbers on a number line. You will need <br> your number line and your number cards to 20. <br> Extra challenge: Look at the number lines on the school website and fill in the missing <br> numbers. You could write the numbers in your book if you don't want to print the sheet. |
| Friday | Ask an adult to write the numbers 1 to 20 on pieces of paper or card and hide them <br> around your house and garden. Find them all and put them in order. Ask someone at <br> home to turn one of the number cards over so you can't see it - can you work out which <br> number is missing? Try this 3 more times. <br> Extra challenge: Use your number line and items to help you fill in the one more, one <br> less sheet below. You could write the numbers in your book if you don't want to print <br> the sheet. |

Tuesday $12^{\text {th }}$ January 2021

Friday $15^{\text {th }}$ January 2021 Extra Challenge
