

Fractions

Write your answers first as an improper (top-heavy) fraction, and then as a mixed fraction in its simplest form.

Q1 $\frac{4}{5} \times 3 = \boxed{\quad} = \boxed{\quad}$

Q2 $\frac{5}{8} \times 3 = \boxed{\quad} = \boxed{\quad}$

Q3 $\frac{2}{3} \times 2 = \boxed{\quad} = \boxed{\quad}$

Q4 $\frac{4}{6} \times 4 = \boxed{\quad} = \boxed{\quad}$

Q5 $\frac{3}{4} \times 5 = \boxed{\quad} = \boxed{\quad}$

Q6 $\frac{5}{7} \times 2 = \boxed{\quad} = \boxed{\quad}$

Q7 $\frac{1}{2} \times 3 = \boxed{\quad} = \boxed{\quad}$

Q8 $\frac{3}{5} \times 3 = \boxed{\quad} = \boxed{\quad}$

Q9 $\frac{6}{8} \times 5 = \boxed{\quad} = \boxed{\quad}$

Q10 $\frac{1}{3} \times 4 = \boxed{\quad} = \boxed{\quad}$

Q11 $\frac{5}{6} \times 2 = \boxed{\quad} = \boxed{\quad}$

Q12 $\frac{1}{4} \times 5 = \boxed{\quad} = \boxed{\quad}$

Q13 $\frac{4}{7} \times 6 = \boxed{\quad} = \boxed{\quad}$

Q14 $\frac{3}{5} \times 8 = \boxed{\quad} = \boxed{\quad}$

Q15 $\frac{7}{8} \times 3 = \boxed{\quad} = \boxed{\quad}$

Q16 $\frac{5}{9} \times 6 = \boxed{\quad} = \boxed{\quad}$

Q17 $\frac{6}{7} \times 6 = \boxed{\quad} = \boxed{\quad}$

Q18 $\frac{3}{4} \times 6 = \boxed{\quad} = \boxed{\quad}$
