

## **Science**

**Learning Objective:** I can identify and investigate simple properties.

Over the next couple of weeks we are going to investigate different materials.

This week we are predicting or making a good guess.

The big question:

**What material is best to be used to make a raincoat for Paddington Bear?**

There is a PowerPoint presentation for this lesson. Each slide has an audio recorded. Some audio will begin straight away and some audio will need to be activated by pressing the button on the slide. It should (hopefully!) 'teach' the lesson. This is a format that we hope to use so in time children will become familiar with the format.

### **You will need:**

Pencil

Activity sheet

PowerPoint presentation
