

Ely St John's Primary School

Year One Bulletin

27th June 2025

In Phonics this week, the children have learnt **ore** saying /or/ as in **core**. Please encourage your child to complete their Home Learning Activity – thank you.

This term, the children are focusing on learning their CLIC Learn Its—specifically, doubles up to 20 (e.g., $6 + 6 = 12$, $9 + 9 = 18$). These facts are an important part of their learning, as they help build quick recall and support their understanding of halving and other number strategies. Please support your child by practising these doubles at home—they're aiming to know them by heart!

If your child has wellies on the racks outside the cloakrooms, please start taking them home. If they're no longer needed, feel free to pass them on to your child's teacher—we'll be happy to add them to our spare pairs. Thank you for your help!

We hope you have a lovely weekend!
