

Ely St. John's Primary School

Weekly Learning – Year 3

WB 11th May
Topic- Geography

Last time you compared life in the Rainforest to your own. This week you will start finding out a little bit more about the Rainforest.

- 1) Look at the information on the Power Point presentation to find out about the different layers of the Rainforest.
- 2) On the activity sheet, number the labels and facts to give the correct information for each different layer.
- 3) CHALLENGE- maybe you could create some art work to show the different layers of the Rainforest. You could paint, make a collage or even a model. Don't forget to send any pictures to us too- we love seeing what you have been working on!

Next time you will be finding out about some of the animals that live in the rainforest!
