

Four in a Row

What you need:

- Sticky labels to cover a 1-6 die in the Roman numerals V, X, L, C, D and M
- Some coloured counters
- A playing board

What to do:

- Find a partner - this is a game for two players.
- Take turns to roll the die. When you see your number, cover it up using one of your counters.
- The first player to get four numbers in a row (horizontally, vertically or diagonally) is the winner.
