

It is fun	Foxes are harmless
It is a sport	It's not fair on the foxes
Too many foxes need to be controlled	It does not achieve anything
Farmers don't like foxes because they come on their farms and kill their animals	It is cruel and mean
It is traditional in the countryside and in rural areas	There will be no foxes left if they are all killed
If they didn't hunt the foxes, there would be too many	It is an instinct for foxes to eat animals and it is not their fault
